Digital Specifications:

Although documents created in QuarkXPress 6.1 or earlier and saved in a Macintosh accessible format are preferred. We accept Mac or PC graphic files. Supported programs include QuarkXPress 6.1, FormsX6, PageMaker 6.5, InDesign CS, Adobe Acrobat 6.0 (if you send a PDF file the fonts need to be embedded and the file should be saved with appropriate spot colors specified), Photoshop 7.0, and Illustrator 11 (or earlier versions of each). If you require, artwork can be created from a rough mock-up, a printed sample or you can supply negatives. Graphics, pictures, logos, etc. should be saved as EPS or TIFF files and included on the disk. The file must include all screen and printer fonts used in your document (Please avoid using the Arial font family, as it does not convert properly). Also include fonts used in logos or other placed graphics that have been created in other applications and then placed (imported) into Quark or other graphics software. A composite laser proof and color separations (output at 100%) must be submitted with the file.

Files submitted electronically can be provided on one of the following forms of removable storage media (disks): Zip disk (250 MB Mac formatted) and CD-ROM.

If sent via e-mail, use either stuff-it or win zip to condense the file. A color proof and separations are still required. Send file to - prepress@infoseal.com
